## **Jumpstarting building electrification**

California must accelerate our transition to zero-emission homes and businesses while moving away from methane. This will improve air quality and safety in our communities while helping achieve our 100% clean energy goals.

I urge the Commission to prioritize building decarbonization and identify more strategies that will jumpstart electrification.

It's clear that electrifying over 13 million homes and buildings across the state will take all hands on deck. The IEPR should help prompt a successful transition toward zero-emission buildings.
