## **Jumpstarting building electrification**

California must move away from methane and transition toward zero-emission homes and businesses. This will improve air quality and safety in our communities.Â

I urge the Commission to prioritize building decarbonization and identify more strategies that will jumpstart electrification.Â

Itâ€™s clear that electrifying over 13 million homes and buildings across the state will take all hands on deck. The IEPR should help prompt a successful transition toward zero-emission buildings.â€
