## **Clean Energy**

Dear Commissioners,

Gas is polluting and it's dangerous. We need to get it out of our energy system, and especially out of our homes and buildings.

The gas industry doesn't want Californians to choose clean energy alternatives. They're pushing back on the IEPR chapter, and claiming that Californians want gas instead of clean energy in their homes and businesses.

California cannot afford another San Bruno or Aliso Canyon disaster. The transition off gas to clean electric buildings is essential not just for the climate, but for the safety and health of our communities.

We strongly support clean energy buildings. "California must move away from methane and transition toward zero-emission homes and businesses. This will improve air quality and safety in our communities.

I urge the Commission to prioritize building decarbonization and identify more strategies that will jumpstart electrification.

It's clear that electrifying over 13 million homes and buildings across the state will take all hands on deck. The IEPR should help prompt a successful transition toward zero-emission buildings.

Thanks for your help on shifting California to a clean energy future.

Sincerely,
