Jumpstarting building electrification

Please move California from methane and transition toward zero-emission homes and businesses. This will improve air quality and safety in our communities.

I urge the Commission to prioritize building decarbonization and identify more strategies that will jumpstart electrification.

It's clear that it will take plenty of work in electrifying over 13 million homes and buildings across the state. The IEPR should help prompt a successful transition toward zero-emission buildings.

Please, the transition is good for us and the environment.

Thank you,
Mary
