Commission staff,

In addition to our previously submitted comments, we ask the Commission to consider the following. In Chapter III, Solar Energy System Component Standards, Section C: Inverters, under the applicable certifications for advanced functionalities, the SunSpec CSIP test requirements are referenced. As included in this section, it may be implied that the certification is specifically relevant to inverters only. We ask the Commission to include a footnote that the certification requirement to IEEE 2030.5:2018, in accordance with the *SunSpec Common Smart Inverter Profile (CSIP) Conformance Test Procedure* applies to the generating facility and may be applied to the inverter, EMS or aggregator.

Thank you for your consideration,

Best,  
Evelyn
