State of California
Energy Resources Conservation and Development Commission

In the Matter of:

APPLICATION FOR CERTIFICATION
FOR THE PUENTE POWER PROJECT

Docket No. 15-AFC-01

WITHDRAWAL OF APPLICATION FOR
CERTIFICATION

On October 16, 2017, Applicant requested a six-month suspension of this proceeding to evaluate the results and implications of an expedited preferred resources procurement process being conducted by Southern California Edison (“SCE”). In response, the Committee suspended these proceedings until May 1, 2018. On April 20, 2018, Applicant requested a further extension of this proceeding, and on May 31, 2018, the Committee further suspended this proceeding until July 1, 2019.

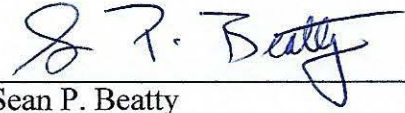

Based on SCE’s recently-approved Revised Moorpark Sub-Area Local Capacity Requirements Procurement Plan and publicly-available information posted to SCE’s Moorpark LCR RFO website, Applicant does not see a viable path forward for the Puente Power Project.

Accordingly, pursuant to Title 20 California Code of Regulations Section 1709.8(a), Applicant hereby withdraws the Application for Certification filed on April 15, 2015. Applicant wishes to express its appreciation to the Committee and to the staff of the California Energy Commission for the many hours of work devoted to review of the proposed project.
