## **Comments in Support of Motion to Terminate (Part 8)**

Attached are the names of 6,982 Californians, who together submit the following comment in support of Sierra Club and other intervenor's motion to terminate this proceeding.

Subject: Terminate the proceeding reviewing the Hydrogen Energy California project

Dear California Energy Commission,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,  
Terry Figone

Subject: Terminate the proceeding reviewing the Hydrogen Energy California project

Dear California Energy Commission ,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,  
Jerry Floyd

California Energy Commission

Subject: Terminate the proceeding reviewing the Hydrogen Energy California project

Dear California Energy Commission ,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,  
Jack Kincaid

California Energy Commission

Subject: STOP the Hydrogen Energy California project(coal powered plant)

Dear California Energy Commission ,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,  
Robert Bartlett

Subject: Terminate the proceeding reviewing the Hydrogen Energy California project

Dear California Energy Commission ,

Are you people insane? Or in a different time zone where the present doesn't matter because your instincts are only on the future?

What about this no-more-water situation? and this mega-monolithic HECA is going to consume some 20% of what's left?

Are you crazy? What are you people supposed to be doing for the rest of us Californians trying to get by?

Please shut this thing down. Now. Before we all lose our minds at how fast we are going to hell in a hand basket.

aures lupi

Dear California Energy Commission ,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,  
Sandra Van Oyen

Subject: Terminate the proceeding reviewing the Hydrogen Energy California project

Dear California Energy Commission ,

I'm writing to urge the California Energy Commission ("CEC") to stop the plan about reviewing the Hydrogen Energy California project. For more than a year, the developer has not responded to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the middle of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could be used for supplying local farmers. Furthermore, without a clear and strong agreement to reduce the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and make plans for other projects that can move the state in the direction of a truly clean energy future.

Sincerely,  
Blair Evans

Subject: Terminate the proceeding reviewing the Hydrogen Energy California project

Dear California Energy Commission ,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,

Subject: Terminate the proceeding reviewing the Hydrogen Energy California project

Dear California Energy Commission ,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,  
Lauren Guzak

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,  
Peggy Rodriguez

California Energy Commission

Subject: Terminate the proceeding reviewing the Hydrogen Energy California project

Dear California Energy Commission ,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,  
Bernabe Contreras

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,  
Kendra Guimaraes

Subject: Terminate the proceeding reviewing the Hydrogen Energy California project

Dear California Energy Commission ,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,  
Dale Biron

David Gerry

We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,  
Sally Reason

Subject: Terminate the proceeding reviewing the Hydrogen Energy California project

Dear California Energy Commission ,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Dear California Energy Commission ,

This is an urgent plea to the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

We in California are in the midst of the worst drought in state history. We cannot afford to hand over 7,500 acre-feet of water every year when that water could provide a critical supply for citizens in need. In addition, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

This is a dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,  
David Frost

Subject: Terminate the proceeding reviewing the Hydrogen Energy California project

Dear California Energy Commission ,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,  
Matthew Hannickel

Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,  
Oscar Gutierrez

California Energy Commission

Subject: Terminate the proceeding reviewing the Hydrogen Energy California project

Dear California Energy Commission ,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,

Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,  
Seth Huletey

Subject: Terminate the proceeding reviewing the Hydrogen Energy California project

Dear California Energy Commission ,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,  
Ellen Wade

California Energy Commission

Subject: Terminate the proceeding reviewing the Hydrogen Energy California project

Dear California Energy Commission ,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,  
Georgia Galey

I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

"Energy Commission staff has completed an independent assessment under the California Environmental Quality Act (CEQA) and has revealed significant, and for the most part, unresolved issues" plus HECA hasn't been forthcoming.

More than 25 mitigation agreements will be required, if mitigation is possible. Mitigation isn't possible in some instances. HECA will still have to purchase CO2 allowances and the proposed CO2 sequestration would end 5 years before the HECA project.

The sequestered CO2 will be used to produce oil which is a greenhouse gas pollutant. The processes used to produce the oil also produce greenhouse gases and other pollutants.

The net effect is not clean energy, most of which will be used to power HECA processes, but a project that will contribute in no small amount to global warming.

The makers of the LIAM F1 Urban Wind Turbine (<http://dearchimedes.com/>) are working on a 20 megawatt model, 21 of which will produce more clean energy than the HECA project, will have a longer lifespan, and will be cheaper to implement and have less negative impact,

Stop HECA now.

Sincerely,  
Jerry Tobe

Subject: Terminate the proceeding reviewing the Hydrogen Energy California project

Dear California Energy Commission ,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,  
Sondra Boes

Dear California Energy Commission ,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers and when residents are being fined when they use too much water. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future. The state should no longer be approving energy projects that use coal or any other fossil fuel.

Sincerely,  
Karen Jacques

California Energy Commission

Subject: Terminate the proceeding reviewing the Hydrogen Energy California project

Dear California Energy Commission ,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

We need to move the state toward clean renewable energy sources, not dirty energy like coal. Approving this project would be a big step in the wrong direction.

Sincerely,  
Ray Chandos
