Docket # 18-IEPR-01 Project Title: 2018 Integrated Energy Policy Report Update

In 2011 during an update of my house, I accepted my personal responsibility to install solar on as much of my house as I could possibly afford. EVERY building, every parking lot MUST be covered with solar. This is an absolutely massive space which just sits there unused! Underlying all this is our responsibility to preserve the ecological systems upon which we all rely for life. We must NOT destroy more ecological systems to allow massive corporofascist solar. Education of the public regarding required ethical thinking/behavior, the importance of ecological systems is vital.
