## **2018 IEPR Update**

I support the focus on electrification as the primary strategy for reduce carbon emissions from buildings and do not agree with arguments from gas interests that biogas is satisfactory alternative. We need to make the investments now to upgrade gas appliances to electric while also electrifying or transportation system and removing fossil fuel resources from the electric grid. I urge the Commission to approve the Final 2018 IEPR Update as is and follow its electrification goals in as aggressive a manner as possible.

Sincerely,  
Dan Brotman
