## **2018 IEPR Update**

I would like to start by commending the California Energy Commission (CEC) on its Final 2018 Integrated Energy Policy Report (IEPR) Update.

It is gratifying to see the strong focus on the electrification of buildings. I believe that electrification is the most viable and cost effective path to zero-emission buildings. We must achieve this.

I strongly urge the Commission to pursue the electrification goals in the IEPR in a manner that greatly accelerates and enhances the electrification market while, simultaneously prioritizing California's most vulnerable and disadvantaged communities, which have historically been left behind.

Thus, I am very pleased with the Final 2018 IEPR Update and request that no changes be made to the report. Thank you.

Sincerely,  
Judith Hoaglund
