2018 IEPR Update

I have already taken significant steps to switch from fossil fuels in my home to electricity, so it is good to see the strong focus on the electrification of buildings, and agree that electrification is the most viable path to zero-emission buildings.

I urge the Commission to pursue the electrification goals in the IEPR in a manner that expediently accelerates the electrification market while prioritizing California's most vulnerable and disadvantaged communities.

The Final 2018 IEPR Update looks good in its current state: I request that no changes be made to the report. Thank you.

Sincerely,
(your name)"
