2018 Integrated Energy Policy Report Update

I am pleased to see the strong focus of the 2018 Integrated Energy Policy Report (IEPR) Update on the electrification of buildings. Certainly electrification is the most viable path to zero-emission buildings.

I strongly encourage the Commission to pursue the electrification goals in the IEPR in a manner that expediently accelerates the electrification market while prioritizing California's most vulnerable and disadvantaged communities. I am urging that no changes be made to the Final 2018 IEPR report.

Sincerely,
