## **2018 Integrated Energy Policy Report Update**

I am in favor of the California Energy Commission's Final 2018 Integrated Energy Policy Report Update. I am happy to see the strong focus on the electrification of buildings, and agree that electrification is the most viable path to zero-emission buildings. I urge the Commission to pursue the electrification goals in the IEPR in a manner that expediently accelerates the electrification market while prioritizing California's most vulnerable and disadvantaged communities. I also request that no changes be made to the report because I am concerned that we need to reduce our fossil fuel usage as quickly as we possibly can, and buildings are a significant consumer of fossil fuels. Thank you for your attention to this urgent and very important matter.
