## **2018 IEPR Update**

I am excited to learn that the California Energy Commission (CEC) is on its Final 2018 Integrated Energy Policy Report (IEPR) Update.

The strong focus on the electrification of buildings is so important, and agree that electrification is the most viable path to zero-emission buildings. Climate Change is a Most serious problem.

I urge the Commission to pursue the electrification goals in the IEPR in a manner that expediently accelerates the electrification market while prioritizing California's most vulnerable and disadvantaged communities.

Thank you for the work you have done with the Final 2018 IEPR Update and I request that no changes be made to the report.

Sincerely,  
Susan Eaton
