## **Save Diablo Canyon Nuclear Power Plant**

I share the concern on global climate change. But if the planet faces a climate emergency, why the call to end nuclear power, America's largest source of emission-free energy? There's only one real-world example of a green new deal that created millions of good new jobs while slashing emissions - France. They are heavily invested in nuclear power and have the lowest emissions/kWh in the world. I'm afraid our over-reliance on intermittent renewables will prevent us from achieving our emissions goals. Shutting down Diablo Canyon is a HUGE step in the wrong direction.
