Electrification is the only path to CA net zero emissions

I am pleased with the Final 2018 IEPR Update and request that no changes be made to the report, because we need to phase out the use of methane gas in all buildings as fast as possible to meet the requirements of Executive Order B-18-55 for CA net zero GHG emissions by 2045 and negative emissions after that. Help the disadvantaged to make the transition with well-insulated, high efficiency heat pumps first.

Don't get sucked into "renewable natural gas" arguments that precious resource must be saved for certain industrial processes and heat recovery fuel cells.

Thanks for helping save our climate!

Jim Stewart, PhD, Lakewood
