Integrated Energy Report Update

You are on the right track with using more solar and phasing out gas. Please remember the desires people are the determinants of policy. Lobbyists for private companies should have no say.

I am happy to see the strong focus on the electrification of buildings, and agree that electrification is the most viable path to zero-emission buildings.

Pursuing electrification goals in the IEPR in a manner that expediently accelerates the electrification market while prioritizing California's most vulnerable and disadvantaged communities is of primary importance.

I request that no changes be made to the report. Thank you.
