## **The Final 2018 Integrated Energy Policy Report (IEPR)**

As a Registered Civil Engineer, I applaud your landmark focus on electrifying buildings to get the carbon—and especially the methane gas—out of our homes and buildings. I have had solar panels for over 9 years. I also just purchased a Tesla Model 3.

As a member of the US Building Council and as a LEED Accredited Professional, I believe we desperately need to phase out gas and ramp up smart electric homes that can be powered by clean energy.

Please, do NOT let the gas industry water down this plan. Thank you!
