2018 IEPR Update

I approve of the focus on electrification in the 2018 IEPR update. We can produce electricity in ways that don't promote climate change or cause ongoing environmental harm. The same is not true of natural gas, which causes environmental harm in both its extraction and use.

Please work for electrification while prioritizing our most vulnerable and disadvantaged communities. The final 2018 IEPR report is good. Please don't make any changes that will slow the much-needed move away from fossil fuels.
