The Final 2018 Integrated Energy Policy Report (IEPR) Update

As a physician, I know the health impacts of climate change and smog. Therefore I was very pleased to find out that The Final 2018 Integrated Energy Policy Report (IEPR) Update has a strong focus on the electrification of buildings. I see that as a way to decrease both smog and greenhouse gases.

I was also pleased to read that A minimum of 25 percent of all technology demonstration and deployment funding is reserved for projects in disadvantaged communities, plus an additional 10 percent for projects located elsewhere but benefiting low-income communities.

Please vote to approve this Plan as is. Don't let it get watered down.
