## **Support for IEPR**

As a California resident who is extremely concerned about climate change and recognizes the need to act as quickly as possible to transition from fossil fuels to clean energy, I strongly support the IEPR report and do not want to see it weakened in any way (which powerful fossil fuel interests will work hard to do). I recognize the need to get to all electric buildings as fast as possible. As someone who has followed planning issues in the city of Sacramento, I am distressed to see that some developers who are proposing large new residential buildings are still talking about heating them with gas. I would like to see 'all electric' be mandated for all new buildings as fast as possible. We also need a program and the means to transition existing buildings to all electric as fast as possible.
