2018 IEPR Update

I commend the California Energy Commission (CEC) on its Final 2018 Integrated Energy Policy Report (IEPR) Update.

I am happy to see the strong focus on the electrification of buildings, and agree that electrification is the most viable path to zero-emission buildings.

I urge the Commission to pursue the electrification goals in the IEPR in a manner that expediently accelerates electrification of our infrastructure to address the needs of all Californians, especially our most vulnerable and disadvantaged communities.

Set the direction and take the leadership role for our country on electrification of our infrastructure and conversion to clean energy.

Don Weiden

Please accelerate the conversion to clean energy. Thank you.
