Electrification of Buildings in Integrated Energy Report

Thank you for focusing on building electrification in the 2018 Integrated Energy Policy Report Update. In Sonoma County, we have been working to require that all new buildings be wired so that they need not rely on methane gas for any purpose. Unfortunately, we have run into a lot of ill-informed resistance.

I agree that electrification is the most viable path to zero-emission buildings, and urge the Commission to vigorously pursue the electrification goals in the report.

I'm pleased with the report, and hope it is approved without any weakening of the building electrification provisions. Thank you.
