Support for 18-IEPR-01

Thank you for focusing on the electrification of buildings, which is critical to phase out gas use and curb methane leakage. I urge the CEC to put the IEPR into action in the 2022 building code and urge the Commission to pursue the electrification goals in the IEPR in a manner that expediently accelerates the electrification market while prioritizing California's most vulnerable and disadvantaged communities.

In sum, I am pleased with the report and request that no changes be made to the Final Integrated Energy Policy Report 2018 Update.

Thank you.
