## **2018 Integrated Energy Policy Report Update**

I strongly support the transition away from fossil fuels to renewable sources of energy such as wind and solar. The climate catastrophe is already set in motion. Fires, mudslides, floods, the atmospheric river -- these are here now, they are not just future possibilities. I favor subsidizing and creating incentives to build an infrastructure not only on existing buildings but retrofits for current buildings. We need energy grids that are localized, not just massive wind farms and massive solar arrays. We need brain trusts and the end of environmental racism. Thank you.
