## **2018 IEPR Update**

I commend the California Energy Commission (CEC) on its Final 2018 Integrated Energy Policy Report (IEPR) Update.

I am happy to see the strong focus on the electrification of buildings, and agree that electrification is the most viable path to zero-emission buildings.

In our own home, we have installed solar and a battery and just purchased our first electric car. We are slowly converting - and that is partially due to incentives from various state and local agencies. We recognize that we are all in this together and want to do our part.

I urge the Commission to pursue the electrification goals in the IEPR in a manner that expediently accelerates the electrification market while prioritizing California's most vulnerable and disadvantaged communities.

In sum, I am very pleased with the Final 2018 IEPR Update and request that no changes be made to the report.

Thank you.

Sincerely,

Monica Campagna  
Resident, Glendale CA
