Item 4. Presentation: Report out from Tribal Energy Summit (November 2018) - Jana Ganion

- Energy access – large swaths of land have no grid power, and tribes are often excluded from energy discussions and eligibility criteria. Also, quality of energy service is inadequate.
- Different types of land tenure are also an obstacle to energy access.
- Specific topics at the summit– EPIC, Storage, Net Metering, Climate mitigation, affordable energy.
- Some recommendations from the Summit:
  - Comprehensive look at tribal participation in energy programs.
  - Review eligibility criteria.
  - Assess what data / tribal data should be included in considerations.
  - Formalizing collaboration – leader to leader (commissioners) and at staff / practitioner level.
  - Weatherization and energy efficiency – next steps, matching tribes and understanding of existing resource. That will be an issue of ongoing work.
