## **100% Clean Renewable Energy - electric**

Dear Commissioners,

I am writing to express my strong support to electrify every building in the state. Besides facing an existential threat by climate change and our dependence on combustible fuels, we also must switch to a fuel source that won't harm us or kill us with potential explosions and emissions. We must shut down Aliso Canyon Gas Storage facility since it is still leaking and harming the San Fernando Valley and Los Angeles because the wind blows and all these volatile organic compounds, heavy metals, crude oil, pesticides etc etc.

We must stop subsidizing any and all combustible fuels, including but not limited to oil, methane gas, biogas (also known as renewable natural gas), biomass and black liquor. It is NOT efficient in any way and is a waste of money. These are all pollutants .

100% clean renewable energy by 2030 is what we want and need. Every Californian deserves clean air inside and outside of their homes, and the only way to ensure that, is to electrify every building, incentivize the switch from fuel sources, ban the sale of any new gas appliance in the state, and safely decommission the aging and dangerous gas infrastructure throughout the state.
