Notice of Availability Imperial Irrigation District Integrated Resource Plan Filing Docket No. 18-IRP-01

Senate Bill 350 (SB 350) (de León, Chapter 547, Statutes of 2015) requires publicly owned utilities (POUs) with annual electrical demand exceeding 700 gigawatt hours to adopt integrated resource plans (IRPs) by January 1, 2019. POU IRPs must be submitted to the California Energy Commission for review by April 30, 2019. POU IRPs submitted to the Energy Commission will be posted for 30 calendar days for public comment.

Upon receipt, the Energy Commission will review the IRP and determine whether it is consistent with the requirements of SB 350. The Energy Commission will consider requirements in the IRP Guidelines as well as public comment related to the consistency of the IRP with SB 350 requirements as part of its review and determination.

On April 15, 2019, Imperial Irrigation District (IID) submitted its complete IRP filing to the Energy Commission, including the four standardized reporting tables. The standardized reporting tables provide data on capacity and energy resources each POU plans to use and the projected progress towards greenhouse gas emission reduction targets. The reporting tables provide supporting information for the IID IRP.

IID's IRP filing is posted at: <http://www.energy.ca.gov/sb350/IRPs/pous.html>.

The IRP Guidelines can be found at:
