Dear Ms. Kelly,

Can a picture say a thousand words? Imagine how our city would look without the plant.

You have a difficult decision ahead. Will Californians adopt new energy sources in the future that will reduce stress on the current energy grid? Are we innovative enough to create alternative power generating plants that make the proposed AES RB plant obsolete? Past history says YES! Please take a stance on innovation and reject the AES license application being brought before the California Energy Commission.

Thank you for your consideration.

Mark Andersen

25 year Redondo Beach Resident
