## **AES Redondo Power Plant**

I received this message regarding the power plant. I am very much in favor of AES building a new plant as I believe we are going to need power in the future. If everyone is to drive electric cars, we will need more, not less power. I think it is short sighted to think Redondo can do away with the plant and leave future generations to do without necessary power. It sounds wonderful to be "Green" but it is unrealistic in this case. I have never experienced pollution from the plant and I live a few blocks away.
