Dear California Energy Commission,

Please do your utmost to help get California off of dependence on gas. It's not fake news that we are in a climate emergency.

Dear Commissioner:

California has already pledged to generate all of its electricity through clean renewable energy by 2045. To meet its climate goals, the state must phase out the use of gas in our homes and buildings entirely. Clean alternatives, such as solar and wind, are ready and are California's best hope for avoiding more devastating climate impacts.

I strongly encourage the Energy Commission to stay on track with California's climate targets and work towards phasing out gas entirely and rapidly.

Thank you.

Sincerely,

Mary Robinson
