## **AES Application for 496MW Power Plant in Redondo Beach**

California Energy Commission;

As a South Bay resident.... since the 1970's, the Redondo Beach power plant has operated minimally.

CAISO's study indicates the power plant is not needed for grid reliability.

The outage of SONGS will increase power needs in Orange County.

A Redondo Beach power plant supplying Orange County would be inefficient.

A Redondo Beach power plant would expose residents to higher particulate emissions.

Please stop the application for the 496 MW power plant in Redondo Beach.

The AES and power transmission line real estate will be better used for recreational, commercial and residential purposes.

Please do not waste this once in a life time opportunity to improve the environment and quality of life in our South Bay community.

Sincerely.... Greg and Mary Lou Diete..... Torrance South Bay Residents.
