RE: NEBB ATTCP Update Report for 2019 Energy Standard Requirements

Dear Mr. Loyer,

This update report is to provide the California Energy Commission with a status update of the NEBB ATTCP program and the necessary changes to our program required by the 2019 Building Energy Efficiency Standard.

2019 Program Training Updates:

NEBB has completed the conversion of our training materials for ATT's. This includes updating our materials to address the changes from 2016 to the 2019 Building Energy Efficiency Standards. Changes from the 2016 to 2019 Mechanical Acceptance Test Forms have been uploaded under the Application for Confidentiality Designation.

Hand's On Training Update:

After review of the updates to the 2019 Mechanical Acceptance tests it has been determined Brownson Technical School and American Training Center training equipment is capable of performing all 2019 NRCA tests forms. Please see letter dated June 14, 2019 from Brownson Technical School.

New NRCA Forms added to our application:

The following tests are new to the 2019 Program. NEBB has provided training modules for each of these and plans on being able to provide training for each. Training modules have been uploaded under the Application for Confidentiality Designation. New Mechanical Tests added to the 2019 Building Energy Efficiency Standards are:

2019-NRCA-MCH-04b-A Air Distribution Duct Leakage
2019-NRCA-MCH-19-A Occupancy Sensor Controls

Reciprocity:

There are numerous contractors within NEBB that also receive training and certification under other ATTCP. It is the opinion of NEBB that requiring additional training from various ATTCP's in order to obtain certification credentials for the purpose of allowing a technician or employer to comply with a project specification creates an unnecessary burden on the citizens and businesses of California. NEBB's has modified our program to allow technicians and employers to obtain NEBB certification under reciprocity from other CEC-approved ATTCP's. Employers and/or Technicians wishing to take part in this option may apply for certification, pay applicable fees and bypass training by proving they are currently in good standing and certified through another CEC-approved ATTCP.

By issuance of this report, NEBB has met all requirements for this program.

We hope that the California Energy Commission finds this Update report acceptable. Please do not hesitate to contact us if you have any questions regarding this report.

Best regards,

Tiffany Suite

Attn: Joe Loyer

We have studied the 2019 Mechanical Acceptance tests and have concluded that our training equipment is compliant and capable of performing all 2019 test forms. This includes training equipment at Brownson Technical School in Anaheim, CA and North American Training Center in Redlands, CA.

Please contact me if there are any questions.
