## **Renewable energy new idea**

I have a new idea for renewable energy which I believe will work I thought about it for quite a long time involves basically a windmill and water it doesn't use water from a river or a waterfall but it needs water to operate it should perform quite well and make energy 24 hours a day 7 days a week and any weather conditions day or night it is much simpler than you think please contact me and I can tell you the rest of my idea I like to get some credit for it this of course will admit no emissions no CO2 and be self-sufficient my phone number is 442-229-9844 I hope you're willing to hear me out and are concerned about this planets future as much as I am
