Notice of Availability
Executive Director Determination on
Roseville Electric Utility
Integrated Resource Plan Filing
Docket No. 18-IRP-01

Senate Bill 350 (SB 350) (de León, Chapter 547, Statutes of 2015) amends section 9621 of the Public Utilities Code to require publicly owned utilities (POUs) to adopt integrated resource plans (IRPs) by January 1, 2019, submit them to the California Energy Commission, and update them at least once every five years thereafter.

IRPs are electricity system planning documents intended to ensure that POUs lay out the resource needs, policy goals, physical and operational constraints, and general priorities or proposed resource choices of an electric utility, including customer-side preferred resources. These plans will provide a framework to evaluate how utilities intend to meet greenhouse gas emission reduction targets as well as energy and other policy goals outlined in SB 350.

Roseville Electric Utility (Roseville) submitted its IRP filing to the Energy Commission on April 11, 2019. Staff reviewed the Roseville Electric Utility's IRP filing for consistency with the requirements of Public Utilities Code section 9621. Based on staff's review, the Executive Director filed a determination on August 9, 2019, finding the Roseville Electric Utility's IRP filing consistent with the requirements of SB 350. The Energy Commission plans to bring the determination to the November 2019 Business Meeting for adoption.
