AES Redondo

Ms Kelly....I am a 30 year resident of Redondo and live just up the hill from the plant. If there was a real viable option of removing the plant, I might support

Its removal, but there really is not.

California needs power. Smaller and more efficient is good.

Upgrading equals jobs...also good

There is NO WAY such a valuable property will become completely a park: if AES adds open space that's the best we will get.

If AES does not get permission to upgrade I see two alternatives -

A developer puts in high density condos and commercial space....something the roads and other infrastructure cannot support and the people have detected numerous times in a similar area....unacceptible

AES simply walks away from an old inefficient plant. If people don't like the way it looks now....wait for a few years of total neglect.....can you say 'rust belt'?

Thank you, please support the upgrade,

Richard Glerup
