Public Comment

Good afternoon, my name is Madeline Di Giorgi. I'm the Chair for the Natural Resources and Environmental Commission for the city of South Pasadena. My comments are personal, not as a city representative. The city of South Pasadena has been successful in implementing a 100% renewable energy system with 98% participation from customers since last year. I would like suggest the use of ad campaigns to get customers excited, education to help customers understand potential increases in costs to switch to renewables and change the infrastructure, while utilizing the assistance of local environmental groups to bring customers on board. If we cannot get these for-profit companies that run our utilities to invest what they need to bring us forward in the right direction, I urge our elected officials to step up and take the initiative to build a new energy distribution system that is resistant to our grievous climate challenges. The time is NOW!!! Thank you.
