AES

I oppose the AES plan to build a new power plant on the parcel where their current plant is located. This is prime property imbedded in a great, densely populated community. Surely AES can build the power plant on a much less expensive property - selling this amazing site for an enormous profit as it is prime real estate. There does not seem to be a compelling reason that dictates this site to be the only option to locate the plant. There are certainly plenty of counter indicative reasons!
