California Energy Commission

RE: Docket 19-BSTD-08: California Needs Solar Roofs

null

California Energy Commission,

Every new roof without solar is a major missed opportunity to lock in pollution-free solar energy. I strongly urge you not to retreat from this important program, and require solar installations on every new rooftop in California.

Residential solar systems pay for themselves in a short period of time and then payback cash savings to the home owners thereafter.

Residential solar systems are a win-win for both home owners and our environment.

We cannot afford to push off this opportunity!

Sincerely,

Sincerely,  
Daniel Devine
