California Energy Commission

RE: Docket 19-BSTD-08: California Needs Solar Roofs

null

California Energy Commission,

Every new roof without solar is a major missed opportunity to lock in pollution-free solar energy. I strongly urge you not to retreat from this important program, and require solar installations on every new rooftop in California.

Sincerely,

Sincerely,
Lydia Briedis

From: [Aron Brinkerhoff](#)

California Energy Commission

RE: Docket 19-BSTD-08: California Needs Solar Roofs

null

California Energy Commission,

I have a friend who bought into a small development with roof-top solar and storage batteries in every unit. She sells her unused electricity back to SMUD and rarely has a bill in the double digits, even when heat is in the triple-digits.

To me, this model is the way to take the burden off the grid; turn to clean energy sources leaving coal and harmful fossil fuels behind; and ensure sustainable energy for all those new homes going forward.

While I am quite fond of SMUD as a public utility, letting them provide solar in lieu of the requirements of existing programs is a very bad idea. For one, the homeowners will cede their energy and the equipment to SMUD, and every new roof without solar is a major missed opportunity to lock in pollution-free solar energy. I strongly urge you not to retreat from this important program, and require solar installations on every new rooftop in California.

Sincerely,

Sincerely,
Julie Kanoff

RE: Docket 19-BSTD-08: California Needs Solar Roofs

null

California Energy Commission,

Every new roof without solar is a major missed opportunity to lock in pollution-free solar energy. I strongly urge you not to retreat from this important program, and require solar installations on every new rooftop in California.

Sincerely,

Sincerely,
Lezlie Navarro
