California Energy Commission,

Every new roof without solar is a major missed opportunity to lock in pollution-free solar energy. I strongly urge you not to retreat from this important program, and require solar installations on every new rooftop in California. We are at a crossroads and we need to take bold steps. We put solar on our roof and it just makes so much sense. Cost just keeps coming down and it's basically free power! Stand strong on this Solar roof policy and continue to require Solar for new homes!

Sincerely,

Sincerely,
Peter Berg
