Oppose the Power Plant in any form

I've been a South Bay resident for ten years, and I'll be starting a family this fall. I do not want my daughter to grow up in a polluted environment (I can get that in Long Beach). I really don't understand why we are even considering producing more dirty energy. This is insane. With all the detrimental effects on our health and the environment brought on by dirty energy, why aren't we building wind turbines or installing solar panels on every rooftop? The transition to clean energy has to start somewhere. Why not here?
