## **Reconsider REACH code approvals**

The adoption of the REACH codes will undermine statewide codes and standards, prohibiting a balanced approach to energy policy. The intent of the CEC is to prevent overreliance on one energy source. Please reconsider locally adopted REACH codes.

Furthermore, why is this such a secretive approach to jamming electrification down the citizens' throats? Do you understand how devastating this would be to so many families in California? Do you understand how expensive it would be for 100% electrification? Are you going to dole out BILLIONS of dollars for retrofitting homes and upgrading the electrical grid?

This is absolutely crazy ... include the citizenry's voices in your darn proposals.
