Proposed new AES power plant

Dear California Energy Commission,

Please count me as a resident of Redondo Beach who vehemently opposes AES' plan to build a new power plant in our community. My understanding is that the new plant will not be cleaner, will not be silent, will provide little \$\$ to the City, and is not needed for grid reliability. In fact, my understanding is that this new plant will emit 5-15 times the amount of fine particulate pollution it does now.

Additionally, the constant hum will likely exceed our noise ordinance for residential development.

Our City Council voted unanimously to oppose this ridiculous idea, and has passed a building moratorium to eliminate power generation as a conditional or permitted use.

Please do what seems obvious to every Redondo Beach resident as the correct course of action in denying this unnecessary plant application.

Regards,

Chris Elson
