AES Application for 496 MW Power Plant in Redondo Beach

I'd written the California Energy Commission in opposition to the AES Power Plant on August 23, 2013.

I appreciated the CEC holding their first meeting on the subject in Redondo Beach.

Fortunately, I've moved my family two miles further south of the polluting AES Plant. We're now 2 1/2 miles from the AES Site.

The Redondo Beach City Council has unanimously opposed AES's Application, because it's not necessary per CAISO'S STUDY, it's a known public health hazard, and it does not positively contribute to the proposed renovation plans for the PIER and King Harbor's small boat marina.

Also, it's unlikely that any of California's or the Fed's Regulator's would approve a power plant at this beautiful sea side location today.

Few people lived in Redondo Beach when Commonwealth Edison built the first electric power generation plant on this site, and the EPA was non-existent. Perhaps the health risks to small children and adults was not known then.

As i'd written in my last e-mail, "please do not waste this once in a life time opportunity to improve the environment and quality of life in our beautiful and safe South Bay Community."

Sincerelyâ€¦ Greg and Mary Lou Dieteâ€¦. Torrance South Bay Residents.
