*Comment Received From: LANES AIR CONDITIONING & HEATING, INC.
Submitted On: 12/29/2019
Docket Number: 19-BSTD-06*

Reconsider REACH code approvals

The adoption of the REACH codes will undermine statewide codes and standards, prohibiting a balanced approach to energy policy. The intent of the CEC is to prevent over-reliance on one energy source. Please reconsider locally adopted REACH codes.

Natural Gas is still in abundant source of energy and can safely be used for decades to come. It provides an endless source of heat for residential homes in California. This is not the time to end its use without a clear replacement plan in place.
