Climate Scenarios and Analyses to Support Electricity Sector GFO - 1 vs 2 grants

During the workshop for the Forthcoming Solicitation Regarding Climate Scenarios and Analyses to Support Electricity Sector Vulnerability Assessment and Resilient Planning on 12/16/2019, I suggested that the CEC might broaden its pool of offerors for this solicitation and the ultimate quality of the solutions provided by leaving it up to the respondents to choose whether to propose for either one of the two distinct parts (1. Climate Projections / 2. Engagement, Analytics, & Data Platform) OR both. To this suggestion, a request for an example was made by a CEC representative.

An example of this type of solicitation by NASA's Science Mission Directorate (SMD) Applied Sciences Program can be found here:
<https://nspires.nasaprs.com/external/solicitations/summary.do?method=init&solId={CCF46F9C-21D0-A546-EE85-B2886BFFD82F}&path=closedPast>

The particulars are provided in the "A.45 Earth Science Applications: Socioeconomic Benefits (.PDF)" document which is linked to the above page.

Section 3.2 Solicitation Elements describes the two elements of the solicitation at a high level (Impact Assessments and Community Outreach) and states:

"Proposals must identify which element(s) is the focus of their activity. Teams may propose to focus on one of the elements or on both. Teams interested in both elements may submit either one proposal encompassing both elements, or a separate proposal for each element."
