## **Please oppose SMUD dilution of solar energy promotion**

I am a former ARCO exploration researcher and certainly am not an environmental extremist. However the urgency of meeting the challenges of climate change do not afford any delay in transitioning from fossil fuels. As one who is intimately familiar with fossil fuel production I could recite a long list of non-climate related reasons for expeditiously moving away from fossil fuels. Please do not support SMUD's proposal to delay installation of solar and battery technology.

If you or a staff member would like to discuss this and other environmental issues in detail, please feel free to contact me at [jjones@laverne.edu](mailto:jjones@laverne.edu).
