CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

NEEA appreciates the opportunity to participate in and contribute to this important conversation. The attached document outlines the importance of standards for connected appliances as part of the load management discussion. We look forward to continued collaboration on the subject and are available as a resource should that be helpful.

Another resource that you requested was a link to the large study the BPA and PGE completed November 2018. Here is the link.
